

Hydraulic Power Pack

<3000psi mobile hydraulic power pack

The HI Mining power pack can be remotely controlled to manoeuvred around any site, this 3 phase unit charges the battery powered transport platform while in use.

This system also has remote start and stop with the click of a button which allows the operator to only use power when hydraulic oil flow is required, with the safety of an onboard emergency stop that allows anyone in the vicinity to override and stop the unit.

This emergency stop safety feature ensures that at NO time will the operator of this unit be exposed to uncontrolled hydraulic energy as the remote is the only point at which the power can be reactivated.

Convenient and safe one button On and one button Off, on person start and stop.
